

Topher AI — AI Receptionist Product Sheet

For: Riley (Knowledge Base) | Version 2.0

What Is Topher AI?

Topher AI is a premium AI receptionist service built for service businesses that lose money every time a call goes to voicemail.

We answer your phone, follow up with leads, send booking links via SMS, and make sure no opportunity slips through — 24 hours a day, 7 days a week, without hiring, training, or managing anyone.

You get a dedicated AI receptionist that sounds professional, qualifies leads intelligently, and hands off to you when a human touch is needed.

The Core Problem We Solve

Most service businesses miss 30–50% of their inbound calls. Not because they don't care — because they're busy doing the actual work.

A med spa owner is in a treatment room. A real estate agent is showing a property. A contractor is on a job site. The phone rings. Nobody answers. The caller hangs up and calls the next business on Google.

That's not a staffing problem. That's a systems problem. Topher AI is the system that fixes it.

How It Works

Step 1: Caller dials your number

Every inbound call gets answered immediately — no voicemail, no hold music, no missed opportunities. Riley picks up on the first ring, 24/7.

Step 2: Riley qualifies the caller

Riley has a natural conversation — gets their name, business name, what they need, and how urgent it is. No robotic menu. No "press 1 for sales." Just a real conversation.

Step 3: Riley takes action

Depending on what the caller needs, Riley:

- Texts them a booking link so they can schedule themselves
- Sends an SMS alert for hot leads that need immediate attention
- Answers common questions and specific FAQs about your business
- Escalates to you when a human is genuinely needed

Step 4: Lead is captured

Every caller's information goes into your lead dashboard. Name, phone, what they asked about, urgency level, and what action was taken. Nothing falls through the cracks.

Step 5: Outbound follow-up (within 2 minutes)

When someone fills out your website contact form, Riley calls them back within 2 minutes — while they're still thinking about you, before they've called a competitor.

Full Feature List

Inbound Call Handling

- Answers every call immediately, 24/7
- Natural conversation — no phone trees or press-1 menus
- Handles specific questions, FAQs, and treatment details you provide during setup
- Qualifies callers: name, business, need, urgency, timeline
- Escalates to you when a human is needed
- Handles high call volume without dropping calls

Outbound Callbacks

- Calls web form leads back within 2 minutes of submission
- Leaves professional voicemails if no answer
- Follows up via SMS if call goes unanswered

Two-Way SMS

- Texts booking links directly to callers
- Handles SMS conversations with leads
- Sends appointment reminders (when integrated with calendar)
- TCPA-compliant — honors STOP, START, HELP keywords

Lead Qualification

- Captures: name, business name, industry, pain point, timeline, budget signals, urgency level
- GPT-powered lead scoring (hot / warm / cold)
- Every lead stored with full conversation context

Admin Alerts

- Instant SMS to you when a hot lead comes in
- Escalation alerts when a caller needs a human
- Summary of every call sent to your dashboard

Booking Link Delivery

- Integrates with Cal.com
- Riley texts the booking link directly to the caller

- Caller books themselves — no back and forth, usually under a minute
- Works with your existing calendar setup

CRM Compatibility (Growth & Custom/Enterprise plans)

- Vagaro
 - Mindbody
 - Boulevard
 - Square
 - GoHighLevel
-

What Riley Sounds Like

Riley is warm, direct, and conversational. Not robotic. Not scripted-sounding. Not a phone tree.

Callers regularly don't realize they're talking to AI until Riley tells them — and when Riley does tell them, the most common response is "wow, that's impressive."

That's the point. Riley IS the product demo. Every call a prospect makes to Topher AI is a live demonstration of what their own callers would experience.

You can hear Riley right now by calling (213) 898-6724.

Setup & Onboarding

What happens after you sign up:

- **Onboarding call with Christopher** — we learn your business, your services, your most common caller questions, and what a qualified lead looks like for you.
- **Configuration** — we set up Riley with your business information, FAQs, treatment details, qualification questions, booking link, and phone number.
- **Test calls** — we run test calls together so you can hear exactly what your callers will hear. You give feedback, we adjust.
- **Go live** — Riley starts answering your calls. You start capturing leads you were previously missing.

Typical setup time: Most clients are live within 48 hours of signing up. Complex configurations (multiple locations, custom sales scripts, CRM integration) may take a few days longer.

What Topher AI Is NOT

Not a phone tree.

Riley has real conversations. No "press 1 for appointments, press 2 for billing."

Not a voicemail service.

Riley doesn't just take a message. It qualifies the caller, takes action, and makes sure the right thing happens next.

Not a chatbot.

Riley handles voice calls and SMS. We don't do website chat widgets or social media DMs.

Not a replacement for your team on complex situations.

Riley knows when to escalate. For sensitive client issues, complex negotiations, or anything that genuinely needs a human, Riley hands it off and alerts you immediately.

Not a generic solution.

Every Riley configuration is built around your business — your services, your language, your clients.

What Topher AI Does NOT Handle

To be straight with callers:

- Instagram, Facebook, TikTok, Twitter, LinkedIn DMs — not supported
 - Website chat widgets — not supported
 - Email management — not supported
 - Direct calendar booking — we send the link instantly by SMS, caller books in under a minute
 - HIPAA-compliant deployments — escalate to Christopher
 - Custom API integrations — escalate to Christopher
-

Plans & Pricing

Essential — \$397/mo

Best for: After-hours coverage, missed-call protection, smaller offices, overflow support.

- 24/7 inbound call answering
- Outbound callbacks within 2 min
- Two-way SMS
- Lead qualification + scoring
- Booking link delivery
- Admin SMS alerts
- Lead dashboard
- English + Spanish included
- After-hours + overflow routing

Growth — \$697/mo

Best for: Businesses ready to not just capture leads but actively convert and upsell them. A scalable front desk system without additional payroll.

- Everything in Essential
- Custom upsell and sales script configuration
- Automated SMS drip sequences
- CRM integrations (Vagaro, Mindbody, Boulevard, Square, GoHighLevel)
- Advanced workflows + multi-department routing
- Analytics + reporting
- Higher call volume
- Discovery call + script build included

Custom / Enterprise — starting at \$1,500/mo

Best for: Multi-location businesses, advanced automations, outbound AI, integrated workflows, custom infrastructure.

- Everything in Growth
- Multi-location call routing
- Custom AI voice + personality
- Outbound AI campaigns
- Dedicated onboarding + custom integrations
- Priority support

Spanish Add-on (Sofía) — \$197/mo

Available on any plan. Sofía is a separate AI receptionist configured for Spanish-speaking callers. Colombian dialect. Full qualification and booking capability in Spanish.

4+ locations: Custom pricing. Escalate to Christopher.

One-Time Setup Fees

Setup includes full configuration, voice training, workflow setup, integrations, testing, and launch support. We don't hand you a login and disappear.

Plan	Setup Fee	What's Included
Essential	\$1,000	Full config, FAQ build, booking link, phone setup, test calls, launch
Growth	\$2,000	Everything in Essential + sales script build, CRM integration, drip sequences
Custom / Enterprise	Quoted separately	Scoped per project during discovery call

The Free 60-Day Pilot

Topher AI is currently offering a free 60-day pilot for qualifying med spas. Only 3 spots available.

What's included in the pilot:

- Full Essential plan setup at no cost for 60 days
- Onboarding call with Christopher
- Live within 48 hours
- Full lead dashboard access
- No credit card required to start

At the end of 60 days, you decide if you want to continue. No pressure, no automatic billing.

To qualify: single or multi-location med spa, active inbound call volume, willing to provide feedback during the pilot period.

Common Questions

"Will my clients know they're talking to AI?"

Riley will tell anyone who asks — honestly and immediately. Most clients don't ask until several minutes into the call. When people do find out, the most common reaction is curiosity and interest, not frustration.

"Can the AI answer specific treatment or service questions?"

Yes. We build your FAQs, treatment details, pricing, and policies directly into the script during setup. Callers get real answers — not a message-taking service.

"What if Riley doesn't know the answer to something?"

Riley says honestly: "I want to make sure you get the right answer on that — let me have Christopher follow up with you directly." Then captures their info.

"What happens to my existing phone number?"

You keep your number. We forward calls to Topher AI, or set up a dedicated line — whichever works better for your setup. Christopher handles this in onboarding.

"What if I'm already paying for an answering service?"

Most answering services take messages and read from a script. Riley qualifies leads, sends booking links, follows up via SMS, scores urgency, and feeds everything into a dashboard. It's a different category of tool — and typically less expensive.

"Can I listen to the calls?"

Yes. Every call is logged. You can review transcripts and recordings in your dashboard.

"What if I want to change what Riley says?"

Easy. We update the configuration. Your business evolves and Riley evolves with it.

"How fast is setup?"

Most clients are live within 48 hours. We do a quick onboarding call, build the script, run test calls, and you're live. Most of the work is on our end.

Who Topher AI Is Built For

Perfect fit:

- Med spas and aesthetic clinics
- Real estate agents and brokers
- Contractors and home service businesses
- Legal and insurance offices
- Dental and healthcare practices (non-HIPAA specific)
- Any service business with real inbound call volume

Not the right fit (yet):

- Businesses that mostly get emails, not calls
- Solo operators with very low call volume
- Businesses that primarily need social media DM management
- Hobby-level operations not yet ready to scale

If you're not sure whether Topher AI fits, Christopher is happy to be straight with you. We'd rather lose a deal than set up a client who won't get real value.

Talk to a Human

Every prospect gets a real conversation with Christopher before signing up. No pressure. No pitch deck. Just a straight conversation about whether this makes sense for your business.
